# Updates and innovations to promote soil health

- 
- Updates to VCS rules to streamline soil C projects
  - Enhancements to existing VCS ag sector methodologies
  - Development of new ag methodologies
    - ✓ VM0042 Improved Ag Land Management Methodology (developed by Indigo Ag)
    - ✓ Biochar; possibly Agroforestry
  - Program innovations under consideration
    - ✓ Soil organic carbon performance benchmarks for baseline setting across entire geographies
    - ✓ Incorporation of emerging technologies for MRV
      - Remote and proximal sensing
      - Artificial intelligence and machine learning
